

TRUTH.

GOLDFIELD

NEVADA

Is the Greatest Gold Camp on Earth

Future, will never win. You read every day of sensational strikes being made in Goldfield, the assays panning up into the thousands of dollars a ton, and you envy the lucky parties, but that doesn't make you rich, or feel any better.

YOUR LAST CHANCE TO GET STOCK AT 2 CENTS A SHARE

Is slipping away from you, as the offer may be withdrawn at any moment.

Scores have taken advantage of the offer; why don't you?

You Must Take a Chance Yourself!

Goldfield, Nevada, was discovered in October, 1903, and its richness has amazed the world, over \$3,000,000 in gold having been produced by it since then. The camp has conferred blessings on hundreds of its sturdy pioneers, and has disappointed nobody.

The Goldfield-Guerdon Mining Company,

Which has now been fully organized, owns three claims in the heart of the great Goldfield District—60 acres of Mineral Land through which a 4 foot ledge of Gold-bearing quartz extends, the formation being rhyolitic porphyry, the same as that of the other great mines.

We Have the Surface Showing and are now Developing the Ledge.

WHAT NOTED EXPERTS SAY:

A GOOD GAMBLE.

"I am absolutely astounded at what I have seen. Naturally, I came here with some prejudice as my mining has been largely in the Colorado field, and there mining is of an entirely different character, requiring expensive equipment and heavy outlay. Here I find that the poor man has nearly equal advantages with the capitalist. From the grass roots down nearly all of the mines pay handsomely, while the general formation and softness of rock requires only conscientious labor as against expensive machinery with us. I consider both Tonopah, and particularly Goldfield, a 'good gamble,' and believe that the era of their prosperity has only begun."—Thomas F. Walsh, of Ouray, Colo., in Deseret News.

SIGHTS SET YOU WILD.

"In my career as a mining man I have visited and examined properties in all sections of the country and Mexico, but until I visited the Goldfield and Diamondville camps I have never seen anything which was equal to them. They can show you things there which set you wild. I have examined the outcrops, the ledges and many of the mines, have taken individual samples and have made innumerable pannings and the results almost drove me wild. As to the permanency of the field, there is no question in my mind, and I believe that only the surface has been scratched. There will be mineral in paying quantities in those hills after the present generation is gone. It is the great future gold camp of the world."—J. W. Benson, Mining Expert in Deseret News

TO GET DOWN TO THE GOLD AND TAKE IT OUT, WE NEED MORE MONEY,

and that is the reason we offer you stock in the company at Two Cents a share. The company is incorporated for \$1,000,000 in 1,000,000 shares of ONE DOLLAR PAR VALUE, 500,000 of which are set apart as a working capital.

THIS STOCK IS FULL PAID AND NON-ASSESSABLE.

HERE ARE A FEW OF THE PHENOMENAL ASSAYS.

12 sacks.....	\$ 3,120.02	13 sacks.....	\$ 6,742.03
8 sacks.....	1,342.65	14 sacks.....	7,933.78
